EDUCATION

University of Alberta

Edmonton, Alberta

BSc General, Major in Computing Science, Minor in Biological Sciences

Expected Graduation, May 2026

- o **Concentrations:** Web Applications and Architecture, Machine Learning and AI
- o **Related Coursework:** Data Structures & Algorithms, Web Architecture, Objects & Design, Bioinformatics, Machine Learning and AI, Object-Oriented Programming, Statistics & Applications

PROFESSIONAL EXPERIENCE AND PROJECTS

Sejong Multicultural Centre Mobile Website

Front-end Developer

June 2025 - December 2025

- Designed and developed a bilingual community web platform to host dynamic event listings, program previews, and organizational announcements for a diverse audience.
- Architected a responsive client-side interface using HTML, CSS, and JavaScript, implementing WCAG accessibility standards
- Delivered a secure website that streamlined information access for community members, establishing a consistent digital presence for the organization. Website: <https://edmontonsejong.ca>

Web Application Deployment & Architecture

Full-Stack Web Application

January 2026 – April 2026

- Designed and developed a full-stack web application as part of a web architecture project, implementing core client-server interactions and dynamic data handling
- Built the system using Flask for backend logic, PostgreSQL for database management, and deployed it on Heroku with configured environment variables and RESTful routing
- Achieved a scalable and reliable application structure, improving data organization and enabling consistent performance in a cloud-hosted environment

Email Classification System

Keyword-Based Categorization & Database Management System

June 2023 – July 2023

- Developed an automated email classification pipeline designed to ingest, analyze, and sort incoming messages into predefined categories without human intervention
- Engineered a Python backend using IMAP protocols for real-time data ingestion and REGEX logic for text pattern matching, integrated with a PostgreSQL database for storage
- Created a functional prototype that eliminates the need for manual email triage, significantly reducing organization time by instantly processing and routing unread messages

ACTIVITIES, LEADERSHIP AND OTHER WORK EXPERIENCES

Edmonton Somang Church, Edmonton Central Presbyterian Church

Edmonton, Alberta

Worship Team - Piano/Synth, Bass, Drum

Aug 2017 – October 2025

- Played as a member of a worship team using various instruments, often having leadership roles, adjusting and adapting according to the team's needs

BB2, Makchang Dodook K-BBQ

Edmonton, Alberta

Server/Host

October 2024 - Current

- Collaborated with team members to manage guest flow, communicating effectively with staff and customers to ensure smooth service in a fast-paced environment.

SKILLS

Programming Language: Java, Python, HTML/CSS, JavaScript, SQL, C

Certification: Microsoft Azure Fundamentals

Tools: Android Studio, Microsoft Azure, Jupyter Notebooks, Git, PostgreSQL, Heroku
