PROFESSIONAL SUMMARY

Computer Science graduate with experience developing software applications using Python, SQL, JavaScript, REST APIs, and Git. Passionate about building practical solutions through automation and cloud technologies, with Microsoft Azure Fundamentals certification and a strong commitment to learning new technologies within the Microsoft ecosystem.

TECHNICAL SKILLS

Languages: Python, SQL, HTML/CSS, JavaScript, C, C#, Java

Certification & Training: Microsoft Azure Fundamentals (AZ-900), Google Data Analytics Professional Certificate

Cloud & Development: GitHub, Git, Flask, REST APIs, SQLAlchemy, Visual Studio Code, Jupyter Notebook

Data & Analytics: PostgreSQL, Tableau, Microsoft Excel, Pandas, NumPy

AI & Machine Learning: LangChain, LangSmith, Retrieval-Augmented Generation, Prompt Engineering, Scikit-learn

EDUCATION

University of Alberta

Edmonton, Alberta

BSc General, Major in Computing Science, Minor in Biological Sciences

Graduated June 2026

- **Concentrations:** Machine Learning and AI, Web Applications and Architecture
- **Related Coursework:** Object-Oriented Programming, Data Structures & Algorithms, Machine Learning and AI, Statistics & Applications, Web Architecture, Linear Algebra, Bioinformatics

PERSONAL PROJECTS

AI-Powered SQL Analytics Agent

Self-Serve Analytics Project | Python, PostgreSQL, LangChain, SQLAlchemy

June 2026 - July 2026

- Developed a self-service analytics agent that converts plain-language business questions into SQL queries and returns validated customer and transaction insights from PostgreSQL.
- Designed SQL logic for customer and transaction analysis, including joins, aggregations, date filters, transaction-level calculations, and safeguards against double-counting revenue.
- Tested and validated generated SQL queries using LangSmith traces and manual database checks, improving reliability of business insights for non-technical users.

AI Help-Desk Assistant (RAG)

Generative AI Project | Python, LangChain, ChromaDB, OpenAI, LangSmith

June 2026

- Developed an AI-powered help-desk assistant using Retrieval-Augmented Generation (RAG) to answer customer questions from internal knowledge while preventing unsupported responses.
- Built an end-to-end data retrieval pipeline by chunking documentation, generating vector embeddings, storing them in ChromaDB, and retrieving relevant context to produce grounded responses.
- Enhanced response reliability through conversational memory, prompt engineering, and LangSmith tracing to validate retrieval performance and reduce hallucinations.

WORK EXPERIENCE

Sejong Multicultural Centre Mobile Website

Front-end Developer

June 2025 - December 2025

- Collaborated with stakeholders to develop a responsive bilingual community website using HTML, CSS, and JavaScript, improving access to events, programs, and announcements.
- Delivered a centralized digital platform that improved communication and information accessibility for the local multicultural community.

LEADERSHIP & ADDITIONAL EXPERIENCE

Edmonton Central Presbyterian Church, Edmonton Somang Church

Edmonton, Alberta

Worship Team - Piano, Synthesizer, Drum, Bass Guitar

August 2017 – Current

- Collaborated with volunteer leaders and musicians to coordinate weekly services, demonstrating adaptability, reliability, and leadership across multiple instrumental roles.

BB2 Korean BBQ House, Makchang Dodook K-BBQ

Edmonton, Alberta

Server/Host

October 2024 - Current

- Managed customer interactions while coordinating with team members to resolve issues and maintain efficient service
